Smart Networks: Charting the Evolutionary Path EUTC to Hold its 8th Conference in Madrid 26-28 October 2011

The European Utilities Telecom Council (EUTC), the trade association for telecom and IT professionals in Europe's electricity, gas and water utilities, is organising the largest gathering of technology and telecommunications executives from European utilities and their partners at the Intercontinental Madrid (Spain)

Charting the Evolutionary Path The only European event dedicated to IT and telecom professionals from Europe's utilities, the European Utility Telecom Conference is designed to offer utilities many resources to tackle their current challenges more effectively and efficiently. The conference will address the ICT issues facing utility companies as all sectors look to develop greater intelligence in core infrastructure networks. The programme will continue exploring the theme promoted in 2010 in London, investigating the Evolution of ICT Services and Solutions which are capable of creating and supporting the Smart Networks required in the next 5 years.

Speakers diversity Speakers will include different stakeholders of our industry, with representatives of European, African, Middle Eastern and American utilities, technology providers, and regulating authorities including European Commission and European Parliament.

Increased interactivity This year, EUTC is introducing a new session format, with parallel discussions held during one afternoon around four theme lines. Attendees will be invited to actively participate in one of these forums, moderated by industry experts that will then report to the entire assembly.

International experience Although EUTC's primary focus is on European Utilities, we like to learn from experiences around the world. That's why EUTC2011 will feature an Africa and Middle East breakfast session, and a USA Session; In addition, the programme will feature speakers from Latin America.

The conference also offers plenty of opportunities to network with peers, exchange with speakers, and meet with technology providers who will propose solutions.

About EUTC European Utilities Telecom Council or EUTC is the trade association for telecom and IT professionals at European utilities. EUTC understands that technology is rapidly changing the role of telecom in Europe's electric, gas and water utilities, energy companies and other critical infrastructure companies. As utilities use their vast experience in building and managing sophisticated telecommunications networks to enter Europe's new competitive telecoms markets, EUTC supports their efforts with education, networking, benchmarking and resources.
